Support & Operations Manager | Product Support & QA

Support and operations manager with 7 years in customer experience, including nearly 4 years working fully remotely with global crypto and Web3 users at Binance, Bybit, KoinX and Yellow.pro. Built support operations from scratch, set and met SLAs, and led teams of up to 10 agents while consistently beating CSAT, QA, response and resolution targets. Provided omnichannel support across live chat, email, Telegram, Discord and X (Twitter).

Deep product expertise across Spot, Derivatives, Perpetuals, Margin & Leverage, API trading, Web3 wallets and settlement flows. Hands-on with UAT/staging testing, bug investigation and root-cause analysis with Product and Engineering, alongside support automation, knowledge management and SOP development.

Key Achievements

- Built Yellow.pro's support operations from scratch: 70-page Help Center across 10 product areas, 30-minute response and 24-hour resolution SLAs, and resolution time cut from 4 business days to under 24 hours.
 - Revamped KoinX's user education by writing 90+ product guides and 150+ exchange and wallet integration articles, KoinX's primary self-service resource for users.
 - Turned user feedback into 70+ implemented product features by working with Product and Engineering (KoinX).
 - Rebuilt KoinX's support operations to raise team productivity: created onboarding and training materials and internal SOPs, and automated an estimated 40% of repetitive agent tasks with Intercom workflows.
 - Ran UAT and staging validation on 20+ features and releases, including a flagship MCP-based AI trading agent (Yellow.pro).
 - 98.5% personal CSAT across 80-100 daily cases at Binance (target: 92%); 4.8/5 CSAT across 70-80 daily chats at Bybit (team target: 4.2).
 - 30-second first response time against a 2-minute target, and 4-hour resolution against a 24-hour target (Bybit).
 - Raised India team CSAT from 90% to 96%; coached 20+ agents, 12 of whom were promoted to escalations; team QA 97% against a 94% target (Binance).

-

Yellow.pro (Remote)

Community and Support Operations Manager

April 2026 - September 2026

- Built the support function from scratch, replacing ad-hoc DM-based issue handling with structured ticketing, escalation workflows and troubleshooting playbooks, and cutting standard-ticket resolution from 4 business days to under 24 hours.
- Ran end-to-end UAT and staging validation on 20+ features and releases, including a flagship MCP-based AI trading agent, Portfolio, and leverage & margin parameters, covering order execution, API integrations, deposits/withdrawals and settlement flows.
- Performed functional, regression, integration and edge-case testing; reproduced defects, documented test scenarios, validated fixes and ran pre-production release checks.
- Investigated platform issues with Product and Engineering, converting recurring user problems into bug reports, product requirements and documentation updates.
- Set and consistently met 30-minute response and 24-hour resolution SLAs for trading, wallet and settlement queries that required cross-team investigation.
- Wrote and published a 70-page Help Center across 10 product areas, including Spot, Perpetuals, Margin & Leverage, Fees, Deposits & Withdrawals and API.

- Automated Intercom replies and ticket closures, built Notion trackers for standard and VIP users with condition-based Slack alerts, and wrote the Support Operations Playbook for future hires.

Bybit (Remote)

L4 Senior Client Service Analyst (Managed India CS Team)

Oct 2025 - April 2026

- Handled 70-80 L2 cases daily across Spot, Derivatives, blockchain transfers and API trading, delivering 4.8/5 CSAT against a 4.2 team target.
- Achieved a 30-second first response time (target: 2 minutes) and 4-hour average resolution (target: 24 hours).
- Served as the escalation point for 12-15 complex, high-priority cases daily, resolving deposit, withdrawal and cross-chain transfer issues end to end.
- Worked with Product, Engineering and Risk teams to escalate platform issues, identify root causes and improve operational workflows.
- Handled 4-5 fraud and account-security cases daily, and supported KYC verification, account reviews and transaction monitoring in line with AML requirements.

KoinX (Remote) - Crypto Taxation

Customer Support and Operations Manager

July 2025 - Oct 2025

- Led support operations and the revamp of KoinX's knowledge base, personally writing 90+ product guides and 150+ exchange and wallet integration articles on tax reports, transactions and portfolio tracking.
- Turned user feedback into 70+ implemented product features, prioritizing requests with Product and Engineering by issue frequency and impact.
- Managed a 10-agent support team and built onboarding, training and escalation workflows from scratch, including internal SOPs covering core user scenarios.
- Automated an estimated 40% of repetitive agent tasks with Intercom workflows, freeing agents to focus on resolution and raising team productivity.
- Conducted product training for internal teams to strengthen product understanding, support quality and onboarding.

Binance (Remote)

L2 Customer Support Team Leader

Dec 2022 - Feb 2025

- Maintained 98.5% personal CSAT over 2+ years against a 92% target while resolving 80-100 cases daily across 20+ crypto products.
- Raised India team CSAT from 90% to 96% by running DSAT deep dives, coaching agents and reworking unclear campaign announcements.
- Led 8-10 agents at a time and coached 20+ across my tenure, 12 of whom were later promoted to the escalations team; team QA reached 97% against a 94% target.
- Supported users across Web3 Wallet, Spot & Derivatives Trading, P2P, Fiat Transactions, Deposits & Withdrawals, Staking, Crypto Loans, Earn, account access and 2FA.
- Built product-operations tracking for Binance India to monitor feature adoption and launch bottlenecks, and tested a localized chat and voice support bot for users in India, Pakistan and Bangladesh.
- Investigated security-related cases involving scams, suspicious activity, account compromises and Web3/P2P risks.
- Supported KYC, EDD and RFI workflows while following AML and security procedures.

Arsh Infoservices Pvt Ltd - Customer Service Manager (December 2020 - November 2022)

- Managed customer support operations, team training, escalations, quality standards, and process improvement.

Cinepolis India - Operations Supervisor (October 2019 - October 2020)

- Managed day-to-day customer service and F&B operations, team performance, escalations, and service quality.
